

COMODO CONSTRUCTION

We had two projects with Comodo in 2009, a new deck and a new kitchen. Both jobs were completed within a reasonable period of time (2.5 months for a new kitchen – weather delays included). The initial cost estimates were very reasonable and the work was professional. We are very pleased with both projects, especially the kitchen. Peter worked very closely with us on the initial design so we had a very good idea what the finished product would look like. He assisted us in picking up certain items like backsplash tiling and the taps. Due to the age of our kitchen, it required new electrical wiring, drywall, painting, flooring as well as the cabinets which was all arranged for or done by Comodo. Comodo has access to a number of different experienced contractors who did mudding, painting, flooring, and assisted with installing the cabinets. Any extras were discussed in detail and costs estimate was given before the work was done. The only item we had to arrange ourselves was the countertop. Peter and all the other contractors assisting him were friendly and a pleasure to deal with. We would highly recommend Comodo for any home renovation project.
