

## **Pieter Van Niekirk –Comodo Construction**

**When we began planning our basement development, we met with several renovation companies. We chose Comodo Construction as we were confident they could complete our project to a high standard at a reasonable cost.**

**From the start of the project, we reviewed plans and made adjustments to ensure a great finish. Pieter actively consulted with us during each phase of the project to eliminate surprises. We were able to select materials, textiles and styles that suited our personal taste and pocketbook.**

**During the course of our basement development project, Pieter and his crew arrived on time, and worked through each day reliably. Peter's tradesmen were personable and respectful of our home as they accessed the work area.**

**The Comodo Construction team delivered a beautiful development that we are proud to show off!**
